Art Unit: 1624

## **DETAILED ACTION**

### ***Change of Examiner***

1. Note the change of Examiner in the present application. The Art Unit number (1624) remains the same.

### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Response to Amendment***

3. The response of February 6, 2004 canceled claims 9, 10 and 12-14. Accordingly, claims 1-8 and 11 are now pending. Claims 7, 8 and 11, drawn to compositions and methods of use, are herein rejoined with the elected compound claims.
4. In view of the amendments and arguments in applicants' response, all the rejections of record have been overcome; however, upon conducting a STN/CAS structure search, the following new rejections are seen necessitated.

### ***Obviousness-type Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1624

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-8 and 11 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the claims of copending Application No. 10/651,604. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present compounds are anticipated by compounds within claim 7 of the application and rendered obvious by the other claims (selection of present structures would be within the skill of the worker in the art). Note particularly, that in the formula of claim 1 of the copending application, X can be NZ, R<sub>2</sub> can be NH<sub>2</sub>, R<sub>3</sub> can be the same substituents as the present R<sub>4</sub>, and R<sub>4</sub> can be H.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

8. Claims 1-8 and 11 are rejected under 35 U.S.C. 102(a) as being anticipated by Froehlich et al. Chemical Abstract article. See the STN/CAS printout for specific compounds within the present claims.

***Claim Rejections - 35 USC § 103***

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 1-8 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Froehlich et al. Chemical Abstract article, above. Where not anticipated, one would be motivated to prepare the present compounds from within the genus of the article and/or to prepare the simple alkyl homologs, halo analogs and position isomers of the specific compounds of the article. In the absence of a showing of unexpected properties, no patentable significance is seen in the present selection.

11. Claims 1-8 and 11 are further provisionally rejected under 35 U.S.C. 103(a) as being obvious over copending Application No. 10/651,604 which has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the copending application, it would constitute prior art under 35 U.S.C. 102(e) if published or patented. This provisional rejection under 35 U.S.C. 103(a) is based upon a presumption of future publication or patenting of the conflicting application. See the obviousness-type double patenting rejection above.

**Miscellaneous**

12. It is suggested that a new Form PTO-1449 with the references not initialed on the previous form be submitted. Dates must be given for the references.

**Conclusion**

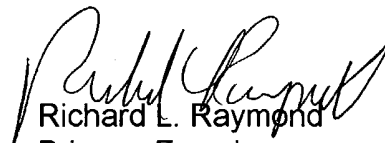

13. This action is **not** made final.
